

solo e sola

ESPRESSO + CIGARETTE CUP

Solo e Sola is an espresso cup that holds a single cigarette.

The Solo e Sola cup was inspired out of need, and could be used to build an entire business model... imagine a food truck offering single espresso shots with single cigarettes. Currently illegal, probably unhealthy, yet understandably desirable, Solo e Sola is a serving piece for a food truck, a cafe or a restaurant, or individuals.

A product of Tomorrow Lab's CoBuilt process [<http://tomorrow-lab.com/cobuilt>], this cup was developed for a low cost using rapid fabrication processes including an inhouse MakerBot and Shapeways.com.

Versions are available immediately in a rapid-produced glazed ceramic food-safe form. We are looking for support sourcing and funding a slipcaster to produce the first hundred cups, as well as distribution and sales logistics with AREAWARE.

Designed by Theodore Ullrich at Tomorrow Lab.
